

PRODUCT SHEET // TUBEBAGS

SKYWALK

CONCEPT

Our Tubebags are designed to significantly simplify the packing process for pilots. They are the perfect companions for pilots who want to pack their paragliders gently and comfortably. With a clear focus on effortless packing speed, a compact and lightweight design, as well as exceptionally high protection for the wing, we proudly present our new Tubebags tailored for various target groups:

SOFTBAG2

The SOFTBAG2 is a classic Tubebag suitable for all types of paragliders. It enables gentle packing of the wing and increases packing speed.

SMARTBAG

The SMARTBAG is constructed in a lightweight design to allow beginner and intermediate pilots a quick and compact packing method. Due to its compression, we recommend the SMARTBAG only for gliders with flexible rigid foils and not for gliders with stiff rigid foils.

GUARDBAG

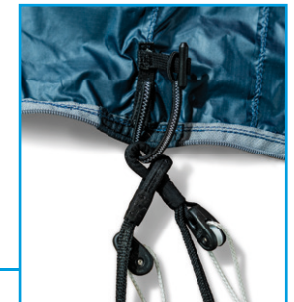

The GUARDBAG is specifically designed for high-performance 2-liners and paragliders with stiff rigid foils. With slightly higher weight, the GUARDBAG focuses on durability and guarantees comprehensive protection for the paraglider.

FEATURES

SOFTBAG2

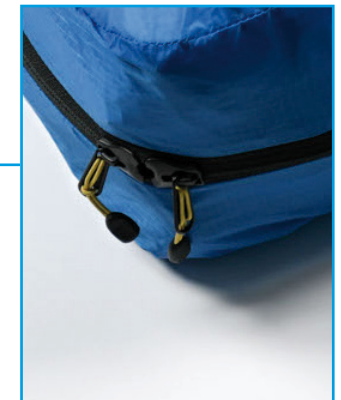

- **2 contrast colors**
Orange for size S, citronelle for size M
- **Padded fixation strap**
For securing the leading edge. Kept in contrast color for increased visibility.
- **Magnetic buckles**
Extremely robust. The webbing is in contrast color for enhanced visibility. 2 pieces for size S and 3 pieces for size M.
- **Toggle Button**
For securing the risers.
- **Mesh material on the side**
For better ventilation.
- **Zipper with two sliders and anti-snagging clip**
The zipper can be opened or closed in both directions. Thanks to the anti-snagging clips, the harness can remain connected to the paraglider. The lines can't get caught in the zipper.

FEATURES

SMARTBAG

- **2 contrast colors**
Citronelle for size S, orange for size M.
- **30DMF paraglider fabric**
Lightweight and durable.
- **Magnetic buckles**
Extremely robust. 3 pieces are kept in contrast color, which mark the folding lines.
- **Toggle Button**
For securing the risers.
- **Zipper with two sliders and anti-snagging clip**
For compressing the SMARTBAG. Thanks to the anti-snagging clips, the harness can remain connected to the paraglider. The lines can't get caught in the zipper.
- **Carrying handle**
For easy handling.

FEATURES

GUARDBAG

- **2 contrast colors**
Citronelle for size S, blue jewel for size M
- **Padded fixation straps**
With flap and foam reinforcement for particularly gentle fixation of the leading edge. Kept in contrast color.
- **Magnetic buckles**
Extremely robust. The webbing is in contrast color for enhanced visibility. 2 pieces for size S and 3 pieces for size M.
- **Riser pocket**
For storing the risers, especially material friendly. Kept in contrast color.
- **Mesh material on the side**
For better ventilation.
- **Zipper with two sliders and anti-snagging clip**
The zipper can be opened or closed in both directions. Thanks to the anti-snagging clips, the harness can remain connected to the paraglider. The lines can't get caught in the zipper. Kept in contrast color.
